Long Island Metro Business Action

LIMBA is a proud organization that began more than 40 years ago. Our goals are attuned to what needs to be accomplished in order to make life more livable in this region.

Educational institutions, all modes of transportation, the arts, economic development, public policy, museum development, hospital systems, and many other topics are of interest to our organization.

We are politically neutral, and engage in no support of any political party. At the same time we actively seek out the support from elected and appointed officials to further the legitimate goals of the region deemed important by the LIMBA board and its members.

As an individual member of this organization I have always felt that my participation made me feel more connected to the place where I have lived and worked. In the relatively small format LIMBA provides, it is easy to interact with our elected officials. On the other hand, elected and appointed officials have a great opportunity to hear first hand our concerns. They come to the LIMBA format eager to share their views, and entertain our questions.

As a new member or guest we welcome you and hope you share our enthusiasm.

Ernest M. Fazio, Chairman
